FutureBuild Asia 2026 Reveals First Speaker Waves, Uniting Leaders Across Asia's Construction Ecosystem

FutureBuild Asia 2026 Reveals Speaker Wave 01–02

Bringing Together Leaders Across Asia's Construction and Built-Environment Ecosystem Bangkok, Thailand — FutureBuild Asia 2026 is set to bring together some of the most influential leaders, experts and professionals from Thailand and across Asia's construction and built-environment sectors, as the event officially reveals its first two waves of speakers under the themes **"The Construction Ecosystem Is Gathering Here"** and **"More Sectors. More Perspectives. One Connected Future of Construction in Asia."**

Scheduled to take place from **11–13 November 2026 at BITEC, Bangkok, Thailand**, FutureBuild Asia 2026 is positioned as a regional platform designed to connect construction and built-environment professionals across policy, standards, technology, innovation and real-world project delivery. The speaker reveal highlights the event's mission to gather a diverse group of industry voices from across the construction ecosystem, including architecture, engineering, infrastructure, real estate, project development, construction solutions, arbitration, finance, sustainability, smart cities, and urban development.

Through its first and second speaker waves, FutureBuild Asia 2026 reflects the strength of cross-sector collaboration by bringing together leaders from both public and private sectors. These speakers represent the people shaping the future of construction, infrastructure and the built environment in Thailand and the wider Asian region.

Under the core positioning of **Regional Platform | Cross-Sector Collaboration | Build Innovation | One Future**, the event aims to provide a powerful platform for knowledge exchange, business networking, policy discussion and industry collaboration.

The conference program will cover key topics shaping the future of Asia's construction industry, including infrastructure development, investment, smart cities, construction innovation, digital technology, clean energy, sustainability, contract management, talent development and resilience in the built environment.

FutureBuild Asia 2026 is more than an exhibition and conference. It is a meeting point for decision-makers, professionals and innovators who are committed to advancing the future of construction and urban development in Asia.

With the first two waves of speakers now revealed, FutureBuild Asia 2026 reinforces its role as a major industry platform where more sectors, more perspectives and more leaders come together to build one connected future for construction in Asia.
